<u>98/</u>

- How
- What
- When
- □ Why

- How am I going to grade you?
- What are we going to cover?
- When are you going to do it?
- Why you should **not** take this course?

Grading

Quizes (Best 2 of 3	50%
---------------------	-----

- □ Class participation 10%
- □ Homeworks 20%
- □ Labs 20%

Answers to Frequently Asked Questions

- ☐ Yes, I do use "curve". Your grade depends upon the performance of the rest of the class.
- □ All homeworks are due at the <u>beginning</u> of the next class.
- □ All late submissions must be <u>preapproved</u>.
- □ All quizes are open-book and <u>extremely</u> time limited.
- Quizes consist of numerical as well as multiple-choice (truefalse) questions.
- ☐ There is <u>negative</u> grading on incorrect multiple-choice questions.
- □ First few chapters are quantitative (lots of calculations)
- Everyone including the graduating seniors are graded the same way.
- ☐ If you have any questions about grading, please ask <u>now</u>.

Textbook

□ A.S. Tanenbaum, "Computer Networks," <u>3rd Edition</u>, Prentice-Hall, ISBN 0-13-349945-6, 1996.

Prerequisite

- □ CIS 675: Computer Architecture
 - □ Memory
 - □ System bus
 - □ Interrupt
 - □ Power
 - □ Voltage
 - Current
 - □ Peak and RMS values
 - □ Sine curve
 - □ Amplitude, Frequency,. Phase
- □ CIS 459.21: C Programming

Raj Jain

Tentative Schedule

9/24/98 Chapter 1: Introduction

9/29/98

10/1/98 Chapter 2: The Physical Layer

10/6/98

10/8/98 **Quiz 1**

10/13/98 Chapter 3: The Datalink Layer

10/15/98

10/20/98

10/22/98

10/27/98 Chapter 4: The Medium Access Layer

Tentative Schedule (Continued)

10/29/98 **Quiz 2**

11/3/98

11/5/98 Chapter 5: The Network Layer

11/10/98

11/12/98 Chapter 6: The Transport Layer

11/17/98 Final Lab due

11/19/98 **Quiz 3**

11/24/98 Last class

11/26/98 Thanksgiving Holiday

12/1/98 Graduating Seniors Grades Due

What Is This Course About?

- This is a course on Networking <u>Architecture</u>
- ☐ This is not a course on network building or usage
- You will be able to understand protocols
- □ You will not be able to build or use a Novell Netware network
- An example of the difference between architecture and implementation is the computer architecture course and a course on Intel Pentium Chip.
- An example of the difference between implementors and users is that of Pentium chip designers and the rest of us.

What Is This Course About? (Continued)

- You will learn about networking concepts that will help you understand networking jargon:
 - □ TCP/IP
 - □ Window Flow Control
 - □ Cyclic Redundancy Check
 - Parity
 - □ Start and Stop Bits
 - □ Baud, Hertz, and Bits/sec
 - □ Algorithms for determining packet routes
- ☐ This is the <u>first</u> course on networking. We cannot cover everything in 10 weeks.

Why You Shouldn't take this course?

- You aren't ready for the hardwork
- You don't have 15 hours/week
- You don't have the background
- You just want to sit and listen
- You are not ready to take the initiative
 Only key concepts will be covered in the class.
 Students are expected to read the rest from the book.
- This does not cover what you want

Office Hours

□ Tuesday: 2:00 to 2:30 PM

Thursday: 2:00 to 2:30PM

- Office: 297 Dreese Lab, 2015 Neil Ave
- No office hours on 10/20, 12/1, 12/3
- □ Grader: Arjan Durresi, DL299, Durresi@cis.ohio-state.edu
- ☐ Grader's Office Hours: M/W/F 2:00 to 2:30PM

- ☐ There will be a lot of self-reading
- Goal: To prepare you for a career in networking
- Get ready to work hard

Quiz 0: Prerequisites

True or False?
T F
☐ ☐ A system with 32kB memory can hold only 16000 ASCII characters
☐ ☐ An example of an I/O bus is PCI which connects a Pentium processor with its memory.
☐ ☐ An example of a system bus is SCSI which connects a PC system with its disks.
☐ ☐ Interrupts are used by CPU to stop an ongoing I/O.
☐ ☐ A DC current of 4 Ampere at 5 Volts will require 4/5 Watts of power
☐ ☐ An RMS value of 100 Volts is equivalent to a peak value of 141.4 V.
\Box For I = A Sin (2 π ft+ ϕ), the amplitude of the current I is A
\square For I = A Sin ($2\pi ft + \phi$), the frequency is f.
\square If x is 0, then after x++, x will be 1.
